

“Licence and Scope of Services” of the offered Files

<u>File format</u>	<u>Stem.mp4-File</u>	<u>Masterproject-Wav-Files</u>	<u>Logic Pro X-File</u>
Intended purpose	DJ/Mixing	Composing/Advanced	Expert
Contents of what you have bought	5 mastered tracks, including master file. You usually get the song divided into drums, basses, synths, FX and of course the master file.	Finished and mastered, incl. bus tracks and master file. The number of stems is the compositional matter of the provider on KEBmusic and varies from song to song. The number of tracks in the DAW file is compressed and bounced into audio files. For example, KreisEckBeats uses about 10 audio tracks per 100 DAW tracks to master the song. You will get exactly these 10 finished mastered tracks + possible bus + 1 master file.	Entire Logic Pro X-Project of the song. Please note: If the provider uses external Hardware-tone-generators for the song, these are modified into audio tracks in the project. External Hardware-tone-generators can not be determined in the project. External Hardware-sound-modifiers are also not included in Logic Pro X projects on KEBmusic. The provider makes the project available exclusively by means of software. The provider is at liberty to decide, how far the song will be “pre-refined” in the project itself by means of mastering plug-ins on the stereo-out or master channel. Please note: The audible preview on KEBmusic is the finished WAV-Master-file, not the sound of the Logic Pro X file.
Public presentation	Yes, you can gladly label the song on your playlist with "licensed by KEBmusic".	Yes, you can gladly label the song on your playlist with "licensed by KEBmusic".	Yes, you can gladly label the song on your playlist with "licensed by KEBmusic".

Using the file under a different name than the one given when purchasing the file from KEBmusic	No	No	No
As a label - using the song for several artists?	No, for each purchase on KEBmusic you have to name one artist who is acquiring the licence for him/herself	No, for each purchase on KEBmusic you have to name one artist who is acquiring the licence for him/herself	No, for each purchase on KEBmusic you have to name one artist who is acquiring the licence for him/herself
Wav or midi files contained in the song from third-parties	Not relevant	Not relevant	KreisEckBeats fundamentally uses very few purchased files for programming the tracks. Externally purchased loops in the Logic Pro X project, which KEBmusic sells as a song component, will only be obtained as a modified and bounced audio track in the project. You will not be able to restore these files to their original. The tracks are labelled "External1, External2, etc2. in the project. If you want to buy the original files anyway, you can see the name of the provider and the name of the respective files on the description of the track on KEBmusic. Using an accompanying link, you can also get to the respective web pages. Note that you only acquire the unedited file, the modification is still your thing. Only with songs from KreisEckBeats can you purchase project tracks, with a statement regarding the ownership of this file. contact@kreiseckbeats.com
Original or modified files to be used in film trailers	No	Contact KEBmusic with a detailed mail, who you are and which files you want to use for which purpose, and all the parties involved will look for a solution. <u>File format</u>	<u>Stem.mp4-File</u>	<u>Masterproject-Wav-Files</u>	<u>Logic Pro X-File</u>
Processing requirements of your computer	Low processing	Low processing	<p>KreisEckBeats currently composes on a Mac Pro Late 2013 - 8 Core - 64 GB Ram. Other providers on KEBmusic might have an even more powerful and faster computer. When purchasing the Logic Pro X file you are therefore responsible for ensuring that your computer has enough power and processing ability.</p> <p>KEBmusic does not provide any money-back guarantee if the project does not run due to a system overload on your computer.</p>
Interface and Plug-Ins	Not relevant	Not relevant	<p>KreisEckBeats produces with "Universal Audio" Apollo 8-interface and three satellites and, among other things, by means of their plug-ins.</p> <p>Other providers on KEBmusic can use other interfaces and may also use their plugins if the device has this option. A plug-in that you do not own will not run on your computer, the song will sound different, sounds may not even be audible or too loud. From the release date, the plug-ins are up to date on KEBmusic, but are not updated thereafter. Also, a missing plug-in can affect bus and aux tracks. You must then find other solutions or buy the plug-in from the manufacturer. With the purchase of a Logic Pro X file you receive no support regarding the set-up of the project.</p> <p>You are able to determine the type of programme structure independently and know how to handle it or modify it, otherwise, KEBmusic does not recommend you buying a Logic Pro X file offered here.</p>
